

Dear Commissioners, I am a very satisfied subscriber of XM Satellite Radio's programming particularly of its traffic and weather service. Being a pilot, I travel for a living, and I make ample and frequent use of XM's traffic and weather service. . XM provides a subscription service of great variety quality. Their traffic and weather programming adds a unique and valuable feature and its removal would significantly degrade my usefulness of the service I purchase. I respectfully urge the FCC to deny petition 04-160 and allow XM to continue to provide a great service at a great value. Thank you.
